RE: Doug Mc Cain

To Whom It May Concern:

This letter is to advise you of the ongoing medical conditions of my patient, Mr. Doug Mc Cain. As his primary care physician, I have treated Mr. Mc Cain for a number of medical problems during the past 3 years. Currently he is being treated for chronic shoulder pain, hyperlipidemia, sleep apnea, asthma, coronary artery disease, and thyroid dysfunction. He has had 9 operations on his knee and numerous other surgical procedures, including coronary artery bypass surgery in April 2000. Mr. Mc Cain will be undergoing yet another operation on December 3, 2004. As he ages and his health diminishes, the possibility of full recovery diminishes with each procedure. I remain optimistic that he will make a full, or nearly full, recovery at this time. However, he faces a long rehabilitative process.

Mr. Mc Cain's patent attorney has advised him that, under certain circumstances, the patent process can be expedited in cases of medical necessity. It is our hope that you will give his application an expedited review. This will allow Mr. Mc Cain to finalize his business and estate plans. If you require additional information, please do not hesitate to contact me.

Sincerely,

Richard S. Abrams, M.D.
